pressure

Aim
Academic Perspective of
ML career: a **unique
moment**

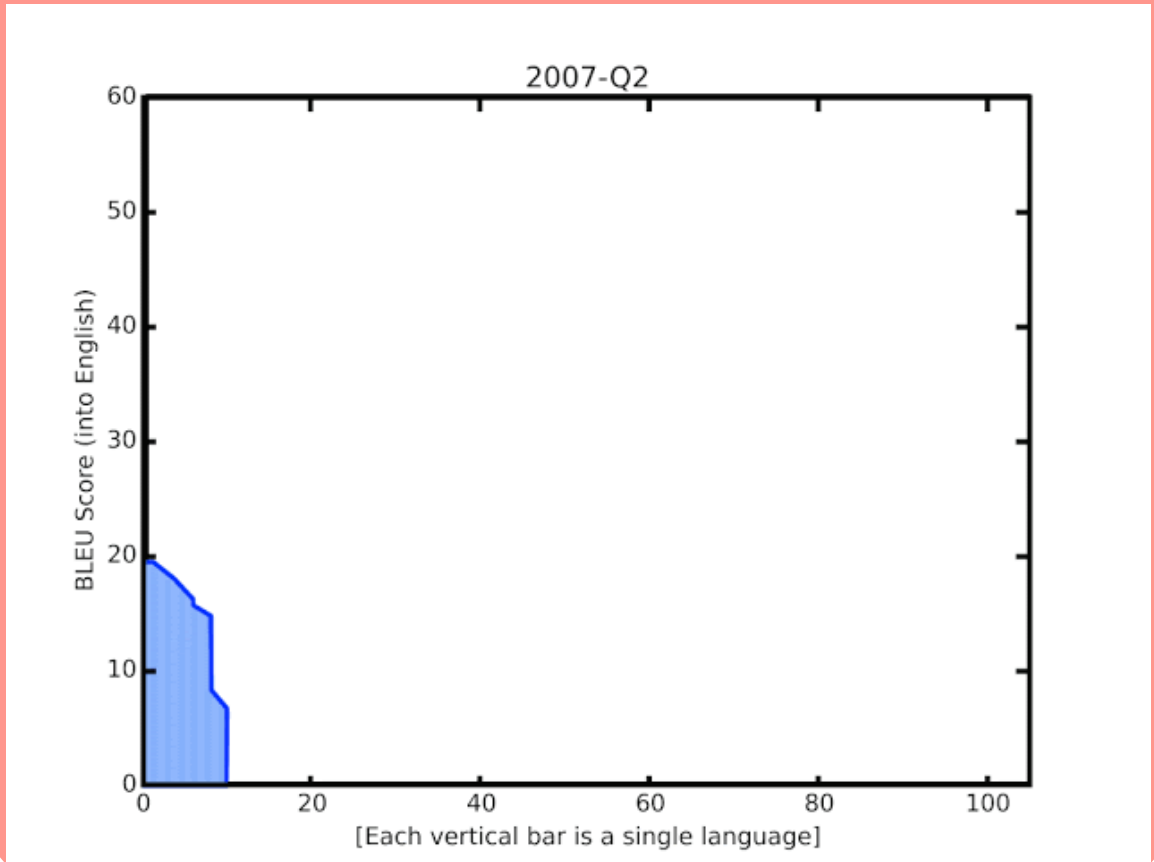

DL golden decade

Computer Vision

[Krizhevsky et al, 12-20]

Machine translation

[Google, '20]

Games

[AlphaGo, '16]

[AlphaStar, '19]

Science

An animation of the gradient descent method predicting a structure for CASP13 target T1008

[AlphaFold, '19]

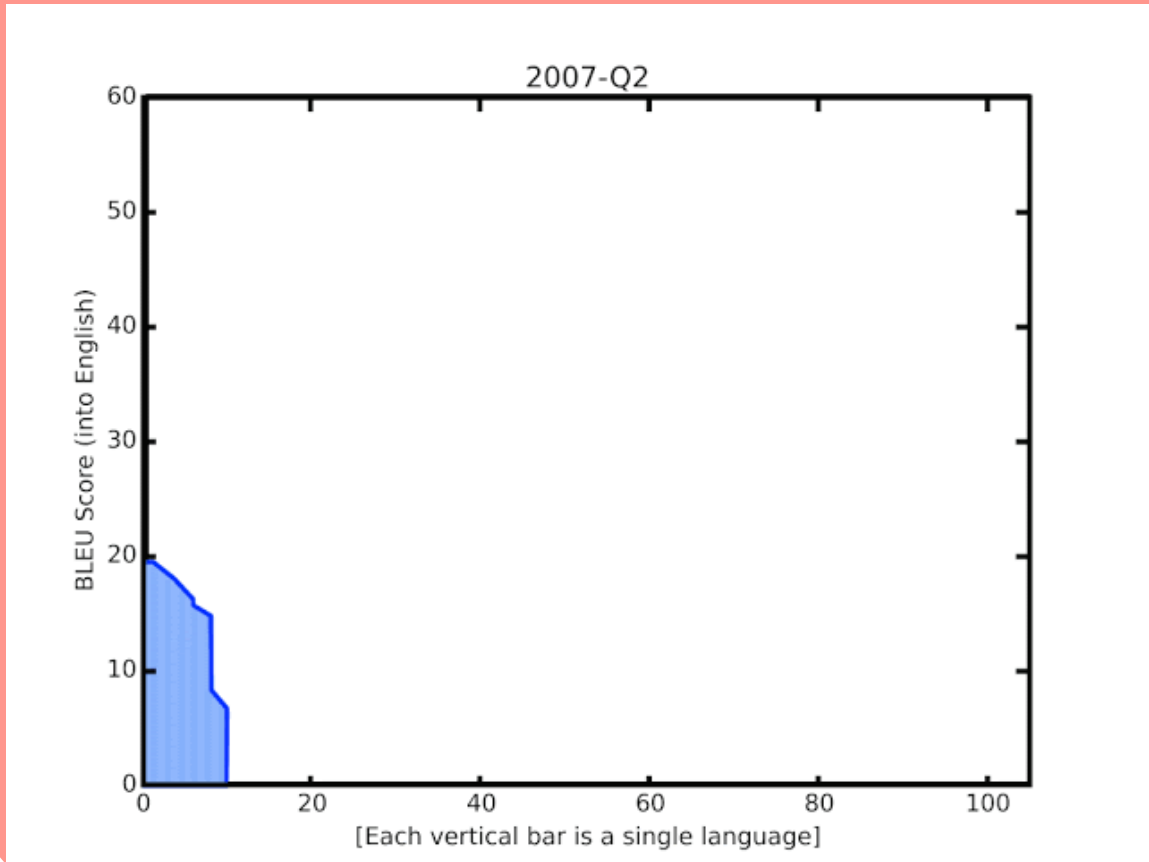

DL golden decade

Computer Vision

[Krizhevsky et al, 12-20]

Machine translation

[Google, '20]

Games

[AlphaGo, '16]

[AlphaStar, '19]

Science

[AlphaFold, '19]

DL golden decade

None of these problems was thought to be possible!

Role of Theory so far?

For instance, there are many important questions regarding neural networks which are largely unanswered. There seem to be conflicting stories regarding the following issues:

- Why don't heavily parameterized neural networks overfit the data?
- What is the effective number of parameters?
- Why doesn't backpropagation head for a poor local minima?

YOUR help!

Can this go on?

Data Hunger

Compute Hunger

Can this
go on?

Critical Need for
Theory
Scaling-up approach
unsustainable

Data Hunger

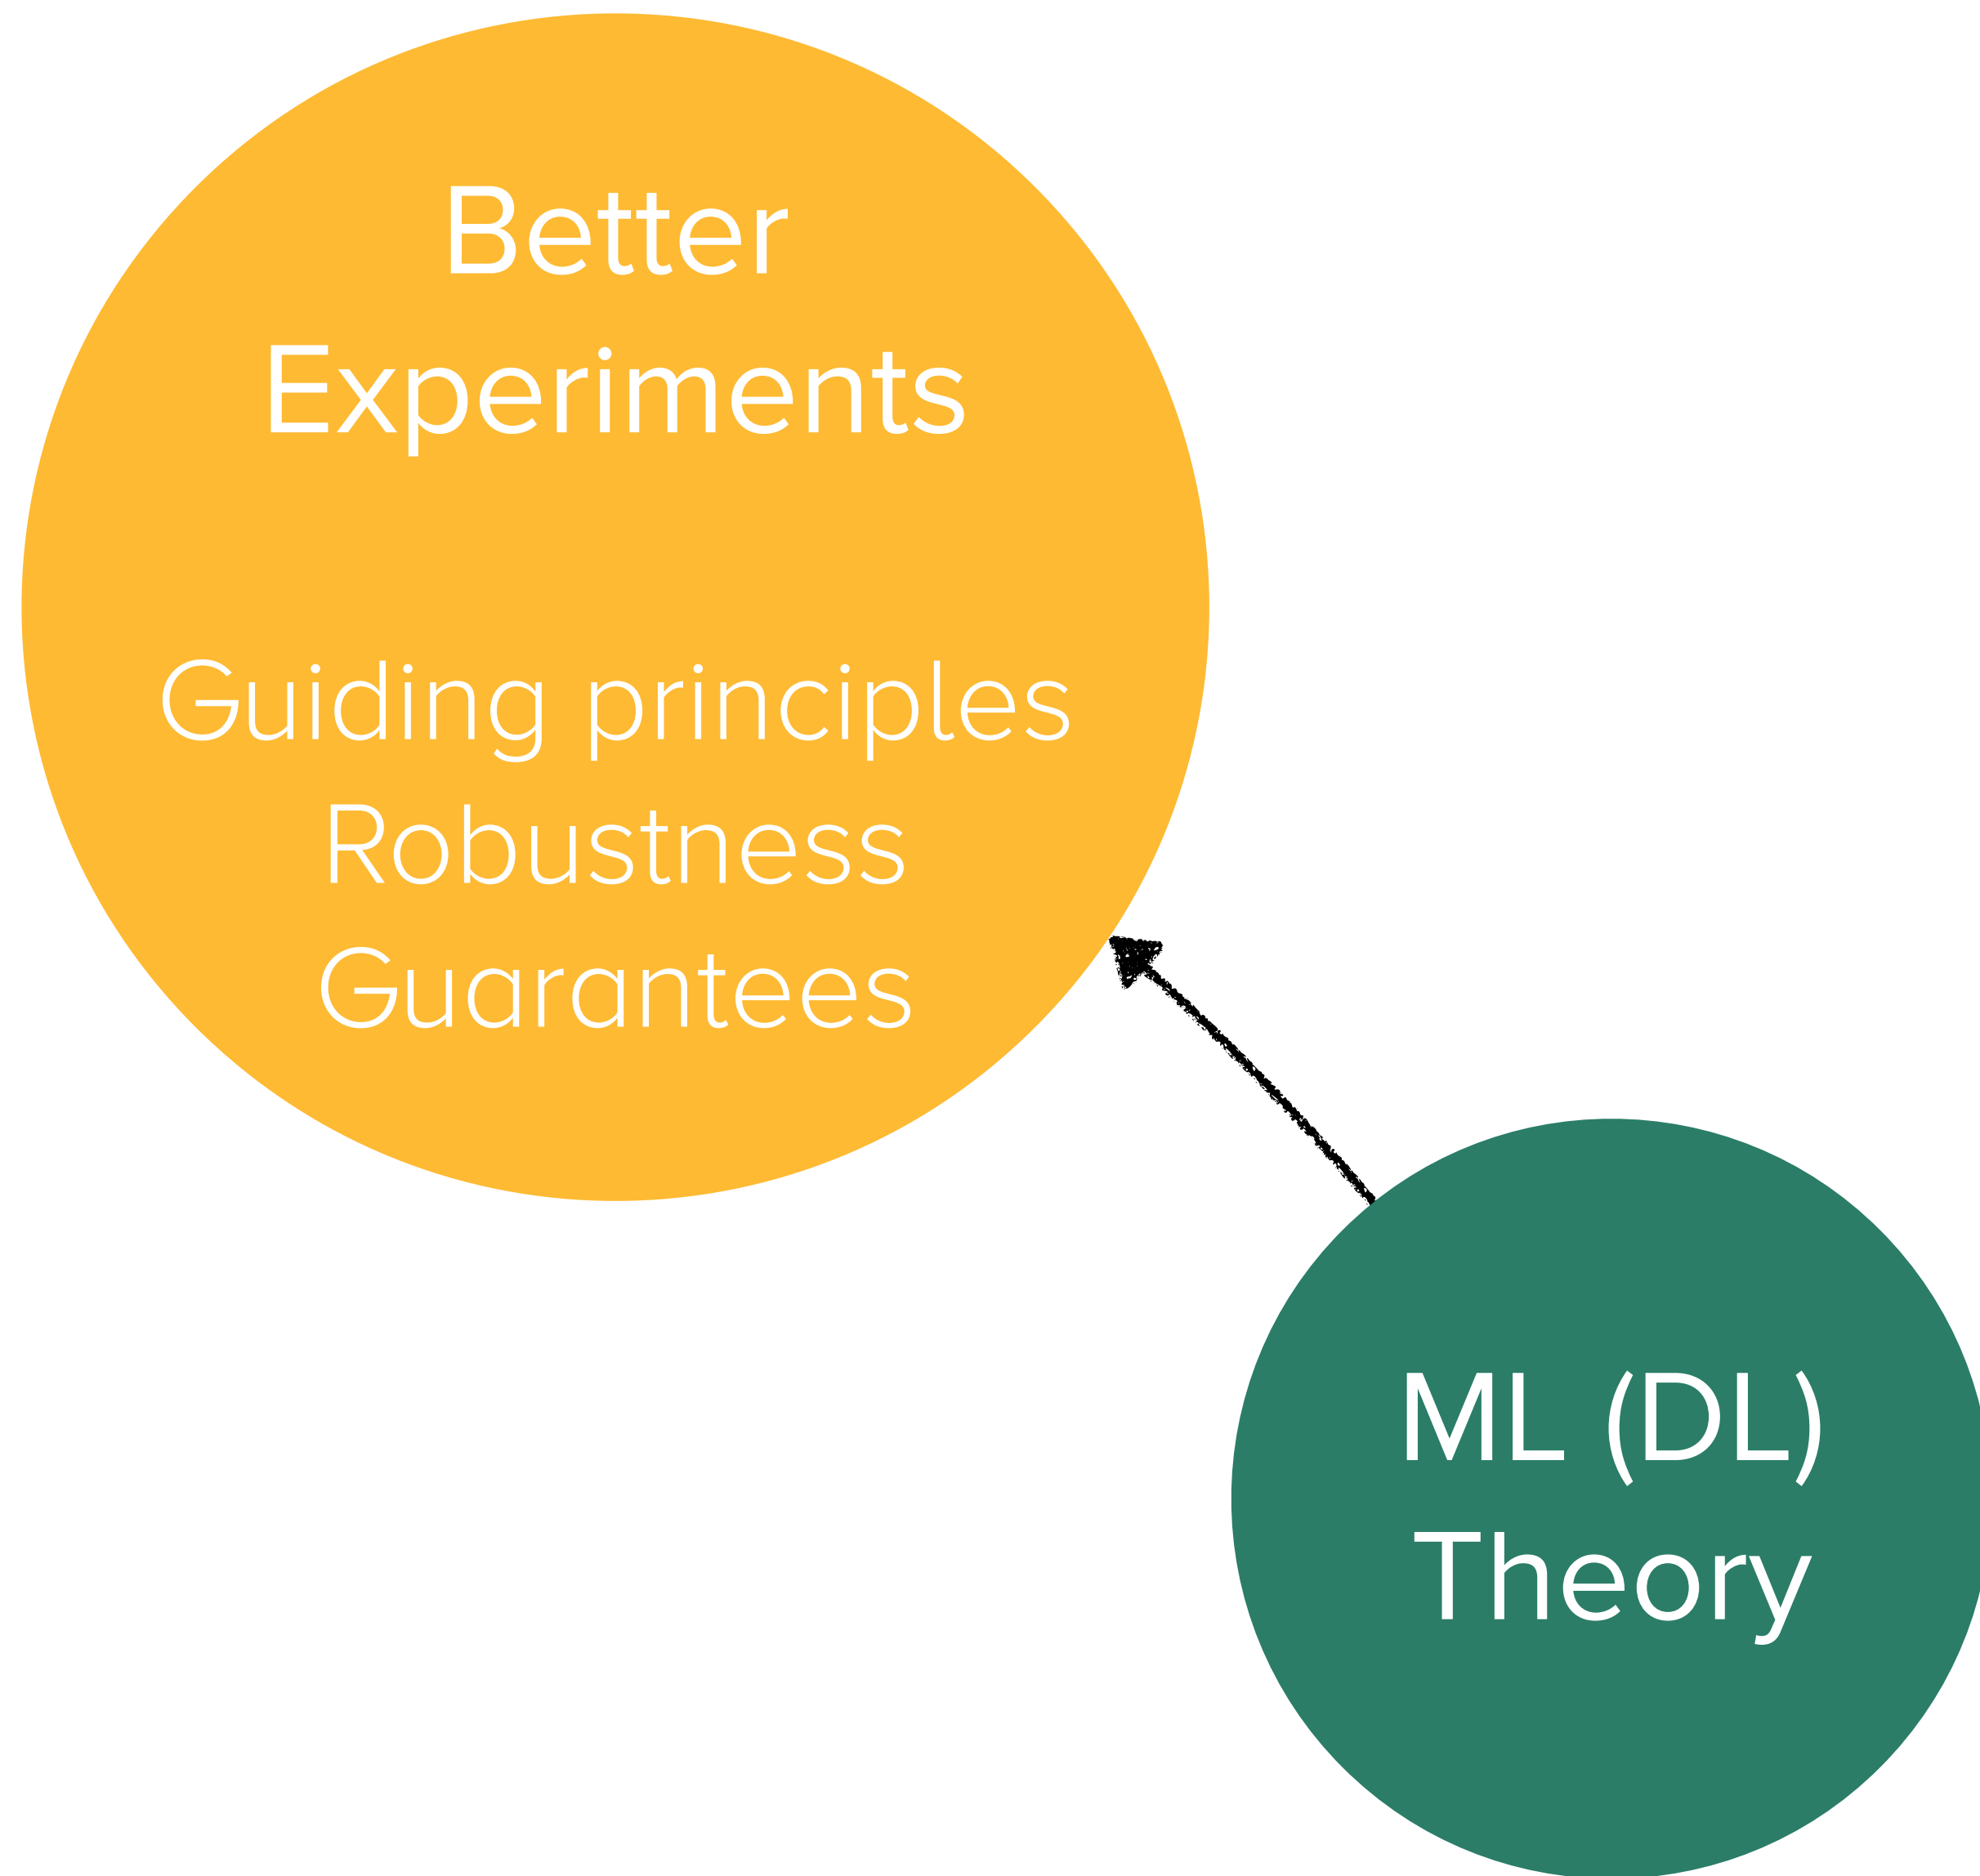

Compute Hunger

Role of ML Theory?

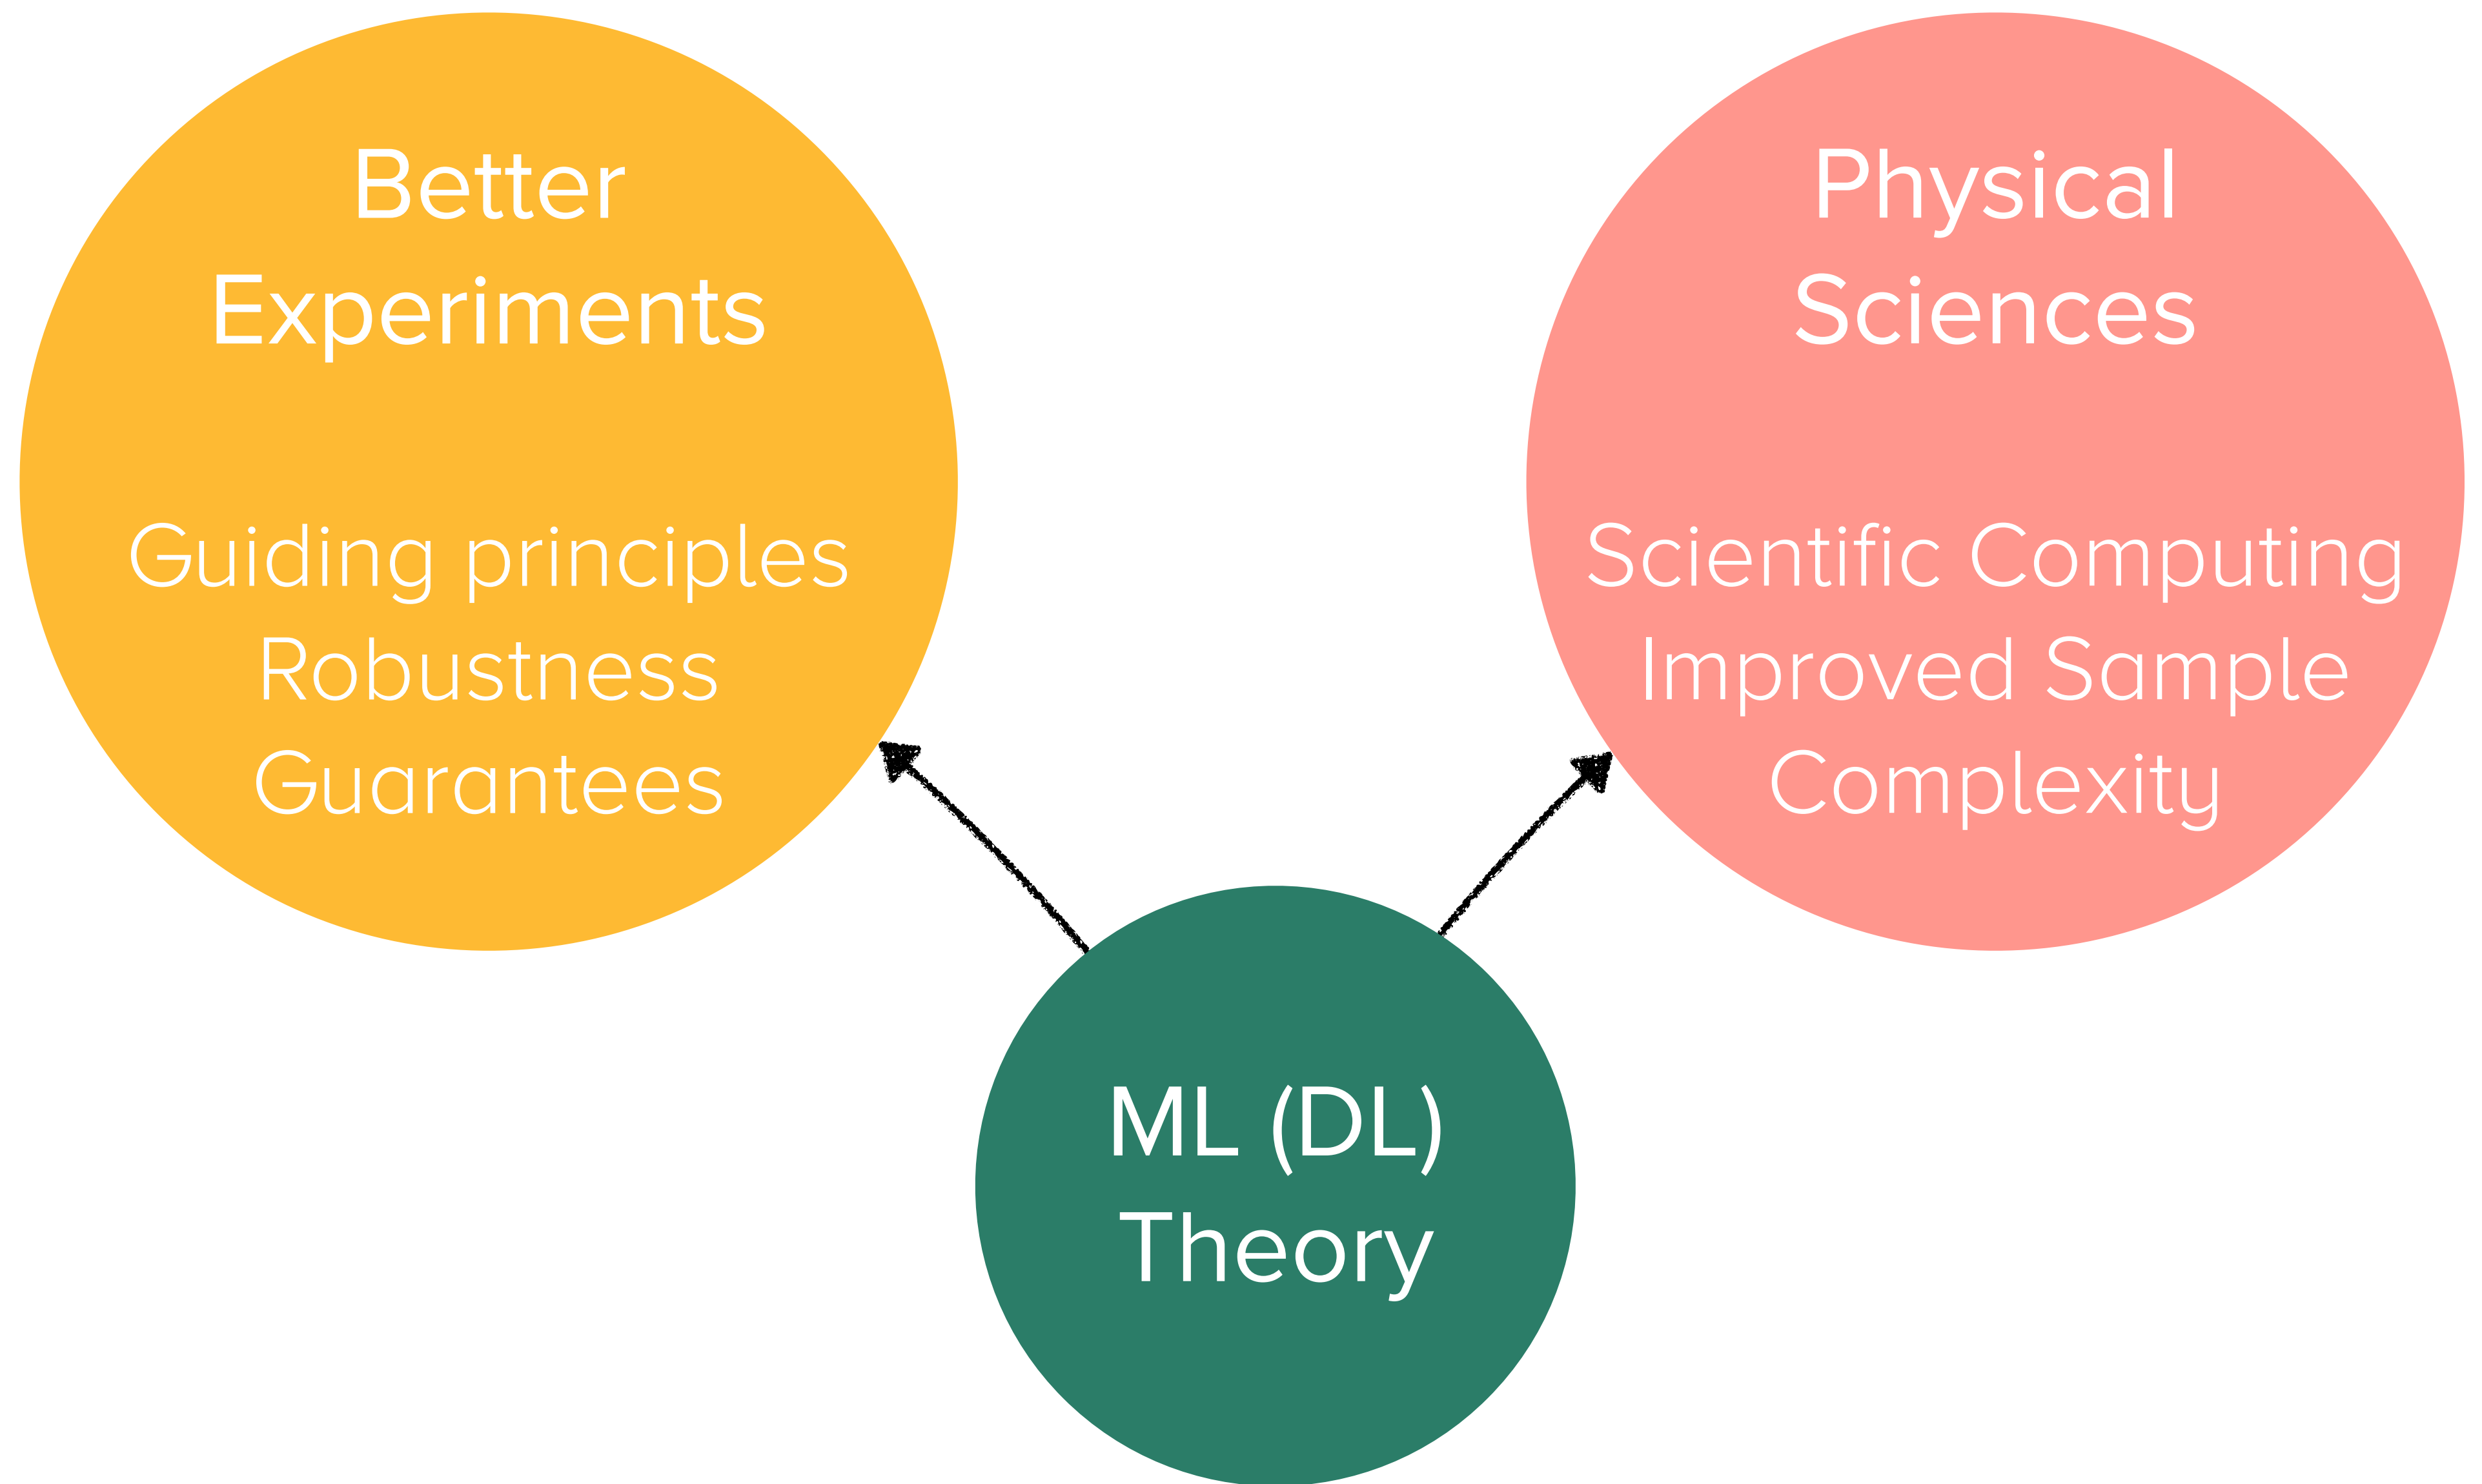

ML (DL)
Theory

Role of ML Theory?

Role of ML Theory?

Vignettes

Quantum Mechanics

[Pfau et al. '19]

Parametrise wavefunctions with deep networks having right symmetries

Cosmology

[with B. Menard lab (JHU)]

Build statistical models of early universe that explain expansion and non-Gaussianity

Distributional Robustness

[Schmidt et al.'19]

Questions
so far?

land

The ML PhD Journey

Trends are
often
unpredictable

Dent
will push
knowledge—
wherever you
land

ML is
remarkably
broad: profit
from it!

ML Academic Ecosystem

ML Academic Ecosystem

My initial view

A few stars single-handedly pushing the field forward with breakthroughs

PhD Duties

Follow my advisor
Write a few papers

ML Academic Ecosystem

ML Academic Ecosystem

My current view
ML research is
primarily a team-effort.

ML Academic Ecosystem

My current view
ML research is
primarily a team-effort.

Team can be:
You & advisor
Your lab-mates
Github org
etc.

ML Academic Ecosystem

Progress *is*
incremental
Good research should
not discriminate.

My current view
ML research is
primarily a team-effort.

etc.

Closing Personal Advice

Closing Personal Advice

Currently
much emphasis
on **designing new**
algorithms, models,
architectures.

Less emphasis
on **analyzing**
current methods
that work well in
practice.

Closing Personal Advice

Currently
much emphasis
on **designing new**
algorithms, models,
architectures.

Less emphasis
on **analyzing**
current methods
that work well in
practice.

Current ML
competition feels
daunting **to**
everyone.

Whenever
possible, shift focus
from papers to
ideas.

ML Civility
A shared
responsibility
(reviewing,
teaching)

Closing Personal Advice

Feel
